District boundaries shall be determined by measurement from and as shown on the Zoning Map and in case of any question as to the interpretation of such boundary lines, the Code Enforcement Officer shall interpret the map according to the reasonable intent of this chapter.

- A. Unless otherwise specifically indicated or dimensioned on the maps, the District boundaries are normally lot lines; section, quarter section or sixteenth section lines; or the centerlines of streets, roads, highways, railways or alleys.
- B. The boundaries of the W-F Wetland-Floodplain Districts as drawn are intended to represent the edge of swamp, marsh, or the ordinary high water line along a stream or watercourse and shall be finally determined by the actual conditions in each specific situation.
- C. The boundaries of the R-L Residential Lake District as drawn are intended to include all lots which abut a lake, and only such lots. Should such a lot be subdivided so as to create an additional lot or lots which do not abut the lake, the latter lot or lots will be removed from the Residential Lake District and become a part of the District which bordered the original lot and must meet all requirements of the bordering District.
