

When each residence and place of business has been assigned its respective number, the owner, occupant and agent shall install or cause to be installed those numbers on the premises along the side of the street on which the home sits; in a place clearly visible from the road, no more than 25 feet from the edge of the road pavement; within 10 feet of either side edge of the driveway; and between 2' and 8' above the finished grade at the point of installation. Numbers shall be installed within 30 days from date of assignment or from the date of initial occupancy.

This is very important in the event that an emergency vehicle is called to your residence.

Please call the Town Hall at 262-646-2398 for additional information.
